(Discuss the relationship between Functions of Management and function of project)

(ناقش العلاقة بين وظائف الإدارة ووظائف المشروع)

Functions of management is concentrating on four objectives which are:

- 1- Planning
- 2- Organizing
- 3- Leading
- 4- Controlling

Planning determines the goals and courses of actions of the organization. Then assigning the tasks and authority that allow the employees to work together to achieve the organization's goals (Organizing). Then motivate and coordinate the employees to work together to achieve the organization's goals (Leading). Then measuring and monitoring the planned system to evaluate how well the organization has achieved its goals (controlling).

While the functions of project is concentrating on different objectives which are:

- 1- Product
- 2- Marketing
- 3- Human Resources
- 4- Finance

From what I mentioned above we conclude that management functions **manage** the project functions by planning, organizing, leading and controlling the project.
